Olympic Education Roland Naul,2010-04-01 Olympic Education is not only a text book for students and teachers in physical and sport education but also for course instructors and coaches in children`s youth sport programmes, as well as for executives in sports federations. It answers the question, what the term Olympic really means in the broader context of the Olympic Games movement and as a global purpose and new challenge for a balanced physical, social and moral education. Olympic Education has a traditional vision and an important future mission that is relevant for all children and youths, in schools as well as in sport clubs. In five parts and fifteen chapters, the book shows why the Olympic ideals are a modern challenge not only for a new physical and sport education but also for the development of essential life skills for today. It introduces pedagogical and didactical fundamentals for an Olympic education, in order to bring motor abilities, social behaviour and moral actions in sports and everyday life back together again - in the mind, learning and actions of children and youths, but also of grown-ups in the social settings where young people live.

God is Beautiful Navid Kermani, 2015-02-16 The melodious recitation of the Quran is a fundamental aesthetic experience for Muslims, and the start of a compelling journey of ideas. In this important new book, the prominent German writer and Islamic scholar Navid Kermani considers the manner in which the Quran has been perceived, apprehended and experienced by its recipients from the time of the Prophet to the present day. Drawing on a wide range of Muslim sources, from historians, theologians and philosophers to mystics and literary scholars, Kermani provides a close reading of the nature of this powerful text. He proceeds to analyze ancient and modern testimonies about the impact of Quranic language from a variety of angles. Although people have always reflected on the reception of texts, images and sounds that they find beautiful or moving, Kermani explains that Islam provides a particularly striking example of the close correlation, grounded in a common origin, between art and religion, revelation and poetry, and religious and aesthetic experience. This major new book will enhance the dialogue between Islam and the West and will appeal to students and scholars of Islam and comparative religion, as well as to a wider readership interested in Islam and the Quran.
